

# THE FUTURE OF PRODUCTIVITY

How Automation Can Boost Your Practice's Efficiency

**Craig Spinks**  
**Veteos Co-Founder & CEO**

VSPA - November 10th, 2022

## What is automation?

Making a process or a system operate automatically

## WHY IS AUTOMATION RELEVANT NOW?

- ▶ Easy-to-use tools are readily available
- ▶ Help productivity while short staffed
- ▶ Avoid things slipping through the cracks
- ▶ Wellbeing reminders and “habit stacking”

## Why I'm a fan of automation

You already use automation!

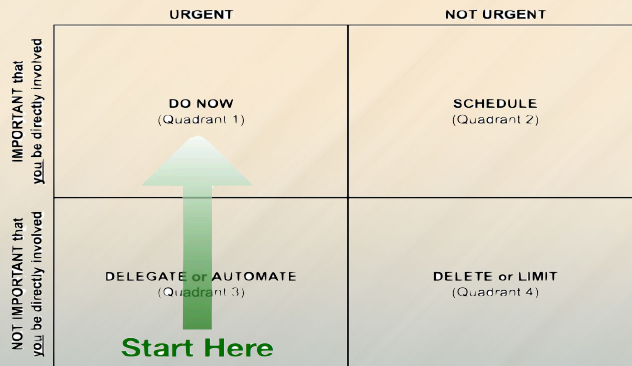

## IDENTIFYING AREAS FOR AUTOMATION

- ▶ Frequent tasks
- ▶ Recurring tasks
- ▶ Causes friction (or wastes time)

## IDENTIFYING AREAS FOR AUTOMATION

## TYPES OF TASKS EASIER TO AUTOMATE

- ▶ Anything you use an app for (smart devices)
- ▶ Tools with APIs (Application Programming Interface)

## PROJECT/TASK MANAGEMENT

## PROJECT/TASK MANAGEMENT

### What is it?

Web-based and app-supported team project and task management platforms

## PROJECT/TASK MANAGEMENT

### How can it help?

- ▶ Allows teams to collaborate on projects and tasks, and helps ensure everyone stays on the same page
- ▶ Recurring tasks can be created to manage frequently repeated tasks or groups of tasks (e.g., end of the night checklists, processing payroll)

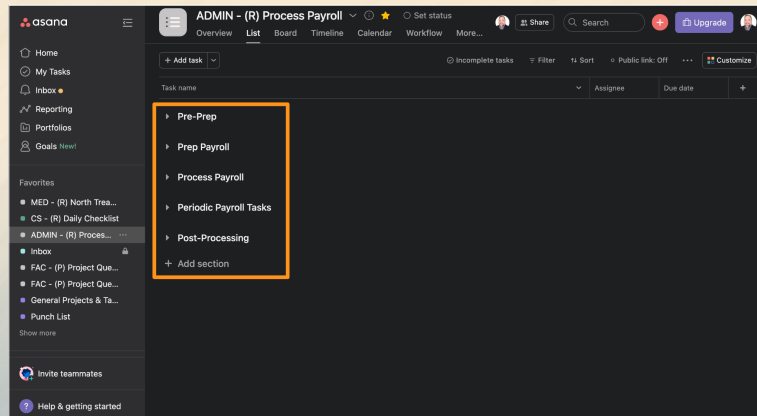

## PROJECT/TASK MANAGEMENT

### Tools Available

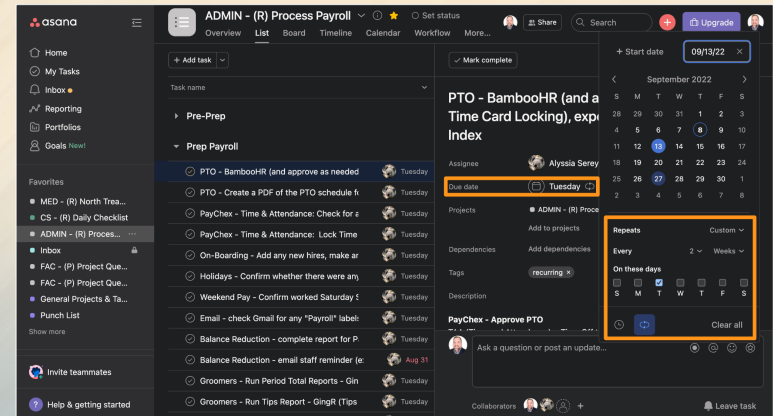

- ▶ Asana - [asana.com](https://asana.com)
- ▶ Trello - [trello.com](https://trello.com)

## PROJECT/TASK MANAGEMENT

## PROJECT/TASK MANAGEMENT

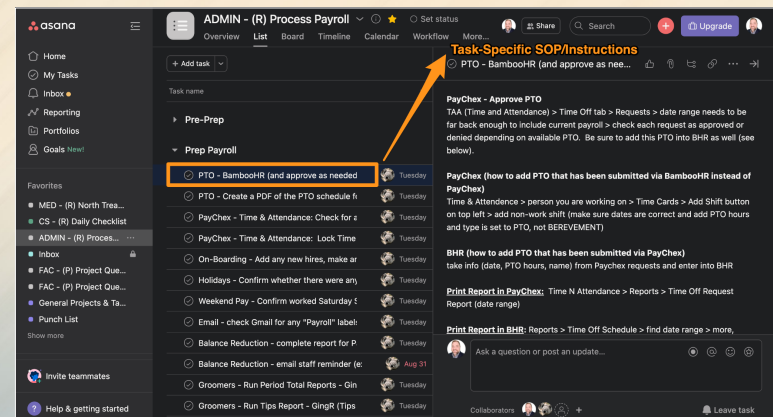

## PROJECT/TASK MANAGEMENT

### Tip

Use task descriptions or details to directly outline the steps and resources to complete the task (SOP) or link to an external SOP reference

## PROJECT/TASK MANAGEMENT

## SCHEDULING TOOL

## SCHEDULING TOOL

### What is it?

Scheduling tools allow users to professionally and efficiently schedule meetings without the normal back-and-forth hassle of proposing dates and navigating scheduling conflicts

## SCHEDULING TOOL

### How can it help?

- ▶ Easily schedule meetings with vendors, staff
- ▶ Access to your availability without visibility of your calendar
- ▶ Create as many meeting types as needed - each with its own type, duration, location

## SCHEDULING TOOL

### Tools Available

- ▶ Calendly - [calendly.com](https://calendly.com)
- ▶ Doodle - [doodle.com](https://doodle.com)

## SCHEDULING TOOL

## SCHEDULING TOOL

### Tips

- ▶ Avoid sounding pretentious
  - ▶ "Want to find a time using this scheduling link that works in your schedule?"
- ▶ Be sure to keep your calendar up to date
- ▶ Balance unscheduled/blocked time

## WORKFLOW AUTOMATION

## WORKFLOW AUTOMATION

### What is it?

Workflow automation allows you to integrate common web apps and services to create automated workflows using "triggers" and "actions" ("if this happens, then do that").

## WORKFLOW AUTOMATION

### How can it help?

- ▶ Connect web apps that normally wouldn't talk to each other
- ▶ Set up multi-step workflows to automate tasks

## WORKFLOW AUTOMATION

### Tools Available

- ▶ Zapier – [zapier.com](https://zapier.com)
- ▶ Make (formerly Integromat) – [make.com](https://make.com)
- ▶ IFTTT (consumer integrations) – [ifttt.com](https://ifttt.com)
- ▶ Jotform – [jotform.com](https://jotform.com)
- ▶ Formstack – [formstack.com](https://formstack.com)

## WORKFLOW AUTOMATION

Special Order Request Automation Demo

## SCHEDULING TOOL

### Tips

- ▶ At first, use the tools you have
- ▶ Avoid fiddling after set up – easy to create errors
- ▶ Don't overcomplicate unless it's truly helpful

## NEXT LEVEL EMAIL

## NEXT LEVEL EMAIL

### What is it?

Increase the functionality of your email workflow by scheduling emails and leveraging third-party tools for advanced features like recurring messages, track views/clicks, and automatic inbox management

## NEXT LEVEL EMAIL

### How can it help?

- ▶ Scheduling email to send at a future date and time
- ▶ Email reminders (return a message to your inbox later)
- ▶ Recurring/automated emails
- ▶ Read/click tracking (has your email been read by the recipient, did they click on a link, etc.)
- ▶ Automate your inbox

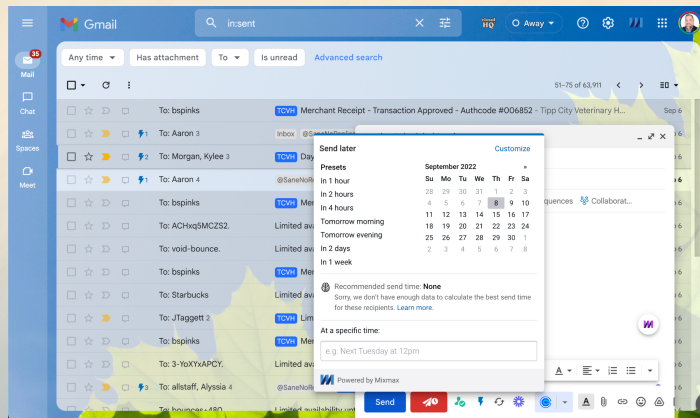

## NEXT LEVEL EMAIL

### Tools Available

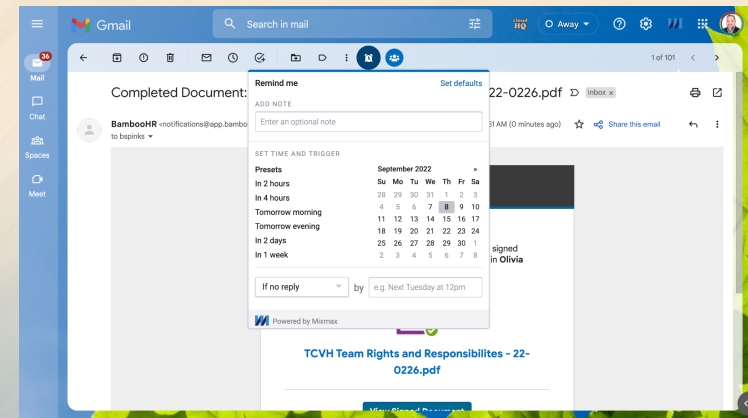

- ▶ Scheduled send functionality is built into many popular email clients (e.g. Outlook and Gmail)
- ▶ Boomerang for Gmail - [boomeranggmail.com](http://boomeranggmail.com)
- ▶ Sanebox - [sanebox.com](http://sanebox.com)
- ▶ Google "gmail email tracking extensions"
  - ▶ e.g., Mailtrack
- ▶ MixMax - [mixmax.com](http://mixmax.com)

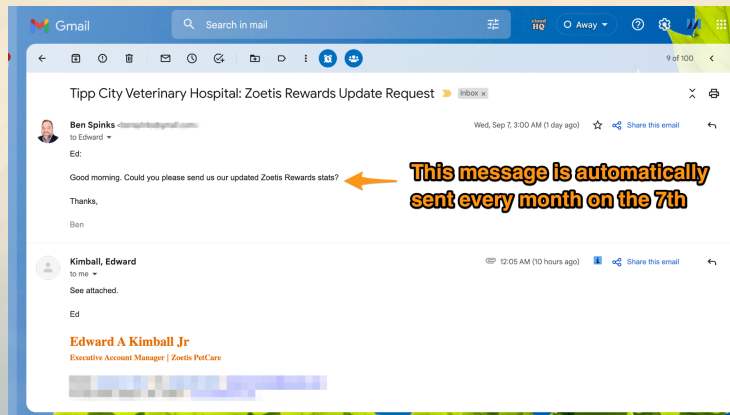

## NEXT LEVEL EMAIL

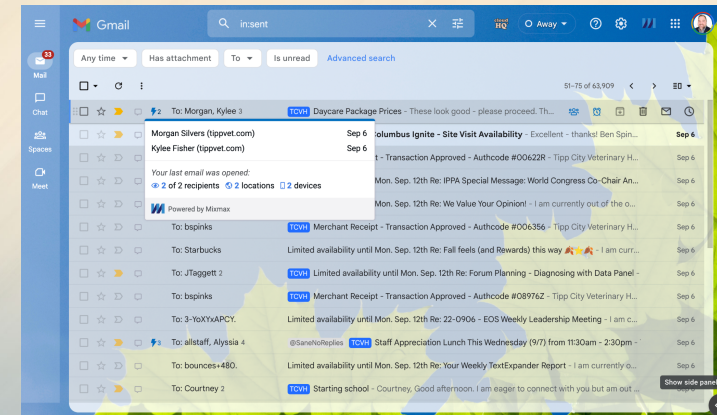

## NEXT LEVEL EMAIL

## NEXT LEVEL EMAIL

## NEXT LEVEL EMAIL

## NEXT LEVEL EMAIL

### Tip

Use these tools to strategically think ahead and make things easier for yourself in the future

## PASSWORD MANAGER

## PASSWORD MANAGER

### What is it?

Password managers are apps that store all of your passwords, so you don't need to remember them. Once logged into the password manager with a 'master' password, it will generate and insert your passwords and other secure information wherever needed.

## PASSWORD MANAGER

### How can it help?

- ▶ You don't have to memorize all your passwords anymore - or god-forbid, keep reusing the same passwords
- ▶ Generates strong and unique passwords for every login
- ▶ Sync passwords between devices and people/team (if one person updates a shared login, all users are automatically updated)
- ▶ Quickly insert stored information into login screen and web forms
- ▶ Two Factor Authentication (2FA) management
- ▶ Be alerted to hacked sites and unsecure login information

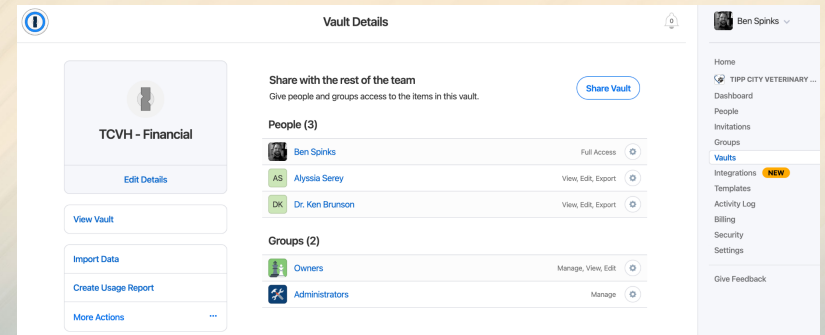

## PASSWORD MANAGER

### Tools Available

- ▶ 1Password - 1password.com (PC/Mac)
- ▶ Bitwarden - bitwarden.com (PC/Mac)

## PASSWORD MANAGER

## SCHEDULING TOOL

### Tips

- ▶ Think beyond passwords (e.g., upload commonly use documents like a voided check)
- ▶ Password managers can be part of your practice's continuation plan in case you become incapacitated (other practice leaders will have secure access to vital information)

### Next Steps

## HOW TO GET STARTED

- ▶ Pick a simple automation to get started (keep it simple)
- ▶ Develop automations over time as you identify opportunities
- ▶ Prioritize automations that will save the most time and make life easier

## WHERE TO LEARN MORE

- ▶ Google/YouTube
  - ▶ "Connecting 'tool 1' with 'tool 2'"
- ▶ Zapier University
- ▶ Asian Efficiency
